

2019
ANNUAL REPORT

FOREWORD

Dear readers,

We have recently celebrated the sixth anniversary of Popálky. In the beginning, the idea was to help injured victims of all ages. Looking back at 2019 and seeing it in numbers, I am proud of fulfilling our mission and of the continuous development of our services.

The time at which we write this report is a time full of uncertainty. Our country, and the whole world has been hit by an invisible enemy called COVID-19. Many people suddenly find themselves in a difficult situation that affects their lives. They must suddenly reconsider their life values.

This is a typical situation, in which our patients, who are affected by burn injuries, find themselves. While their injury might not be significant, their daily lives still change for a few months.

I appreciate that even in these difficult times, thanks to donors, supporters, volunteers, we – Popálky – can be here and help those who have to deal in their everyday life with one of the most painful and serious injuries.

Burns often occur in the environment where we spend these days due to the COVID-19 restrictive measures a majority of our time. At home. That is why I thank all those who, together with us, are trying to spread the prevention and education of burn injuries through our activities. We believe that soon we will be again allowed to meet and talk together not only about these injuries.

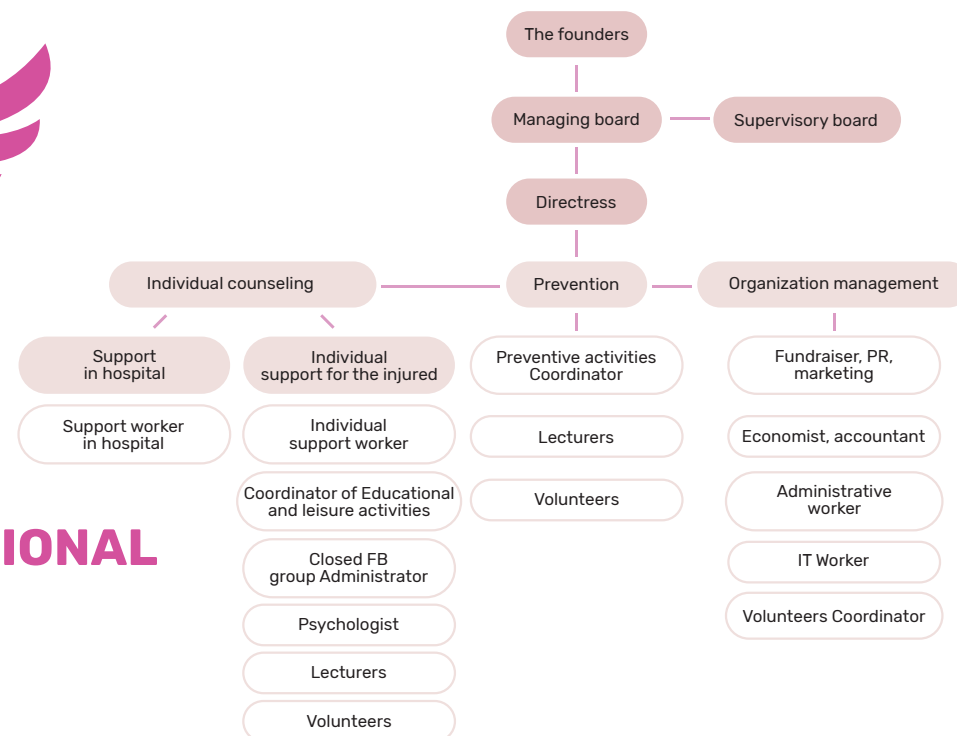

Thank you for your trust,

A handwritten signature in blue ink, appearing to read 'Jana Lacinová'.

Bc. Jana Lacinová, DiS.
Founder and director of the charitable trust Popálky

ORGANISATIONAL SCHEME

INTRODUCTION

We help people with burns and their families to cope with the consequences of injuries that leave scars on the body and soul.

We promote prevention and raise awareness of burn injuries through preventive programs in kindergartens, primary and secondary schools, lectures for the public and participation in outdoor events with the "Preventive Tent" project.

We operate throughout Czechia since August 2019, we are located in Žďár nad Sázavou, our Counseling Center is in Brno.

The emblem of Popalky contains a mythical phoenix in the colour of burnt skin.

There was a change in the Board of Directors of our organisation on 20 January 2019. Mrs Jitka Severová was replaced by Mgr. Stanislav Šulák.

Board of Directors: Mgr. Klára Mayerová (chairwoman), MUDr. Radomír Mager, Mgr. Stanislav Šulák

The Supervisory Board remains unchanged. On 20 January 2019, Mr. Bc. Zdeněk Štursa was re-elected as a member of the Board for the next term.

Supervisory Board: Ing. Jaroslava Kovárníková (chairwoman), Bc. Zdeněk Štursa, Věra Dvořáková

All members of the Board of Directors and the Supervisory Board perform their activities without compensation. Thank you for everything you are doing for us!

In January 2019, we moved the Counseling Center in Brno from Nádražní Street 10 (Čedok Building) to Srbská Street 1370/1. At the end of August 2019, after five years of being based in Brno, we also moved our headquarters from Brno (the University Hospital Brno, Jihlavská ulice 340/20) to Žďár nad Sázavou (Havlíčkovo náměstí 287/46).

INDIVIDUAL COUNSELLING

SUPPORT IN HOSPITAL

Individual counselling begins already during the hospitalisation of the injured person. One of the most important reassurances for patients and their families is that they will not have to deal with the consequences of an accident alone after discharge from medical care. Our organisation offers precisely that help.

Since the establishment of Popálky, we work once a week at the University Hospital Brno at the Department of Burns and Plastic Surgery. Popálky are represented there by our director Jana Lacinová who has had her own experience with burns. Thanks to this, she is able to gain patients' trust and share her experience about life after burn injury.

An integral part of our work in the hospital is cooperation with medical staff, with whom we consult specific patient's questions. We are very grateful for their support of our activities.

a total of **360** clients

120

parents

138

children

102

adults

Main partners

B | R | N | O

In 2019, we established contact with 360 clients at the hospital. Out of these, there were 138 children and 102 adults with burns, and 120 parents of injured children.

INDIVIDUAL SUPPORT FOR BURN VICTIMS

Individual counselling in person, via telephone or 'chat' follows after meetings with patients in the hospital at the Department of Burns and Reconstructive Surgery at the University Hospital Brno. This service is also used by patients from other burn clinics in Czechia – in particular from the University Hospital Královské Vinohrady and from the University Hospital Ostrava.

Most often, the counselling concerns the care of scarred burned areas. Burn victims also ask us for help with non-medical consequences of a burn injury. This includes, for example, assistance in obtaining funding for costly burn treatment, assistance in providing spa care, arrangement of social or legal services in connection with consequences of an accident, communication with the state administration etc. We also connect new clients with former ones.

How did we help in numbers?

total **342** patients, 602 hours

372

hours of direct contact with the patient

230

hours of work for the benefit of the patients

HOW DID WE HELP IN 2019 SPECIFICALLY?

T-MOBILE HELPS SABINA

Three years ago, Sabina (22 years old) had an accident during a school practice in a hotel in Greece. Her left hand got into a hot mangle, and she lost all her fingers. Popálky are in her story from the beginning. In 2018, we assisted her during journey to the island of Rhodes, where she gave testimony about the accident. Thanks to the help of our volunteer Petr Bodský, we managed to secure 50,000 CZK (1,968 EUR) for Sabina from the T-Mobile project.

PLES JAKO BRNO "A BALL LIKE A BRNO" FOR ADAM

Adam (8 years old) is a smart boy. He was born for the second time last year. He was burned by fire on almost 60 % of the body. When our director Jana, who was burned when she was a child as well, came to visit him in the hospital for the first time, he asked her: "How did you manage to handle this?" She told him it was a difficult journey. But thanks to Popálky, his journey will be a little easier. Of course, he has to rehabilitate, regularly lubricate burned areas, stretch wounds, commute to laser therapy. But a dedicated mother stands by his side. Because of him, she stopped working and devoted all her time to his rehabilitation. Thanks to the cooperation with the foundation Pro dětský smích ("For children's laughter") and the "Ball like a Brno Foundation", Popálky can help the family to overcome the financial burden that the treatment of burn injuries entails. Adam's family received 140,000 CZK (5, 510 EUR).

KLIMKOVICE FOR MARUŠKA

Little Maruška (7 years old) was two years old when she got scalded. When she wanted to "help" her mother, she accidentally poured a pot of boiling soup on to herself. It has been several years since the accident, and the treatment of the wounds is still intensive. Maruška is growing, and the wounds must still be lubricated at least once a day, adequately massaged, constantly exercised, stretched and, last but not least, lasered. She is at risk of scoliosis of the spine and general problems of the musculoskeletal system. Although the insurance company reimburses her for the spa once a year, Maruška still needs intensive training. Every care we give to wounds and skin during growth will return many times over in adulthood. Based on a request from Popálky, the company NOTINO paid Maruška another spa stay in 2019 in the Klimkovice spa.

INCENDIO FIRE FESTIVAL FOR ZDENDA

The first weekend of September, the 5th year of the Children's Charity Festival of Fire and Movement Incendio, took place on Střelecký Island in Litoměřice. The main idea of the festival is to support children with burn injuries. The creators themselves have experience with burns because they perform with an open fire. Already in 2018, the organisers of the event started cooperating with Popálky. At that time, no one had any idea that this time the proceeds would go to Zdenda, who coincidentally comes from Litoměřice, who suffered burns. Zdenda's life (14 years old) changed in August 2018. He wanted to make french fries, but the overheated oil in the pan caught fire. Zdenda tried to extinguish it with water. It caused a hot oil explosion and Zdenda ended up with burns on 75 % of his body. He was transported by helicopter to the Královské Vinohrady University Hospital, where he fought for his life for half a year. His path to recovery was very challenging, he had to undergo several skin transplants, which were not always successful. In the hospital, he and his family learned about Popálky thanks to the Incendio festival. Then Zdenda's mother contacted us. We advised them, for example, how to lubricate wounds, what clothing is suitable, or how to heal open wounds. His skin does not "breathe" after so many transplants, so we provided him with recommendations on how to protect himself from the sun and from the cold in winter. Zdenda fought for his life during last year's Incendio festival, and no one knew that our cooperation would have such a great impact. The proceeds from the festival in 2019 reached incredible 52,000 CZK (2,046 EUR). The money helped twice. Half of the money went to Zdenda, the other half to Popálky to help other people with burns. We know that the treatment of burns is not only mentally but also financially demanding, so we are glad that together with Incendio, we were able to help Zdenda.

HELP FOR MILUŠKA

Mrs Miluška (65) was severely burned after a gas explosion in her apartment. We have been in contact with her and her family since immediately after the accident. In 2018, we helped them negotiate debt relief of almost 260,000 CZK (10,232 EUR) for the destroyed flat. In 2019, due to the health condition of Mrs Miluška, we acted with the ombudswoman of the Health Insurance Company of the Ministry of the Interior of Czechia about paying of another treatment.

In 2019, thanks to the "Health for Moravia Foundation" (Nadace zdraví pro Moravu), we could purchase 39 pieces of Scar Esthetique creams for the care of wounds for our patients.

CLOSED FACEBOOK GROUP

In 2018, we set up a closed Facebook group. Here, people with burns can exchange experience with aftercare from the safety of their home. They share their worries connected to their posttraumatic condition that of or their loved ones. At present, this group has almost 280 members, and the number is still growing.

Communication is vital in the treatment of burns. We will help you establish important contacts with other patients or parents of injured children. Sometimes a conversation with a person who has experienced the same can have incredibly healing effect. That is why we will be happy to welcome you to the closed Facebook group, which is focused on the exchange of experiences after a burn injury for both children and adults. The members of the group are not psychologists or specialists. They are people who have gone through an accident and want to share their experience with challenging moments in life. Communicating with people who share a personal experience with burns can help you mitigate the psychological impact of an injury.

EXAMPLES OF CONVERSATION FROM A CLOSED FACEBOOK GROUP

Hello group, we are currently in a hospital in Ostrava with 2nd and 3rd-degree burns. Could you please tell us, how did your treatment go? What about skin surgery? How is it treated after healing? Our son is 1.5 years old. Thank you.

Hello, I would like to ask if you have any experience applying Contratubex patches on children under three years of age? My son is less than two, we bought the patches, but the leaflet says "do not use on children under three years of age." Thank you in advance for any comments!

A disparity arose between the left and right hand after wearing the compression sleeve on the upper right part of my daughter's arm. The left one is muscular as it should be. The right one is narrow and thin at the top (where the compression sleeve was), and her forearm is thick, much thicker than her left hand. Will it get better?

Hello, our little one burned herself by a fireplace (burn 2b-3rd degree). Now she is five weeks after the injury, three weeks after an autotransplantation. Can anyone tell me what the rough strip of skin is? We lubricate with Scar ointment, but could maybe Mepiform patches under the glove help? We are going for a laser on Monday for the first time.

Good evening, I would like to ask if you have dealt with an injury on a child's leg and putting on shoes. My son has a skin transplant on his instep and fingers. He steps on his foot, but I can't put the shoes on.

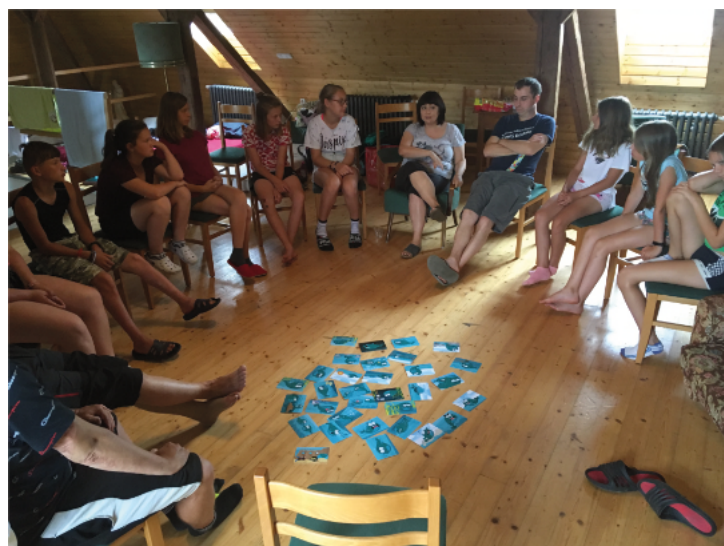

EDUCATIONAL MEETINGS

Burn victims and their loved ones often feel lost and do not know how to deal with consequences of a burn injury. Whether with the care of injured areas or with the art of responding to people who are inappropriately reacting to the aesthetic differences of wounds. Therefore, we used a support of the Ministry of Health and organised four educational meetings in 2019.

Two of these meetings were aimed at injured children, their siblings or the children of injured parents. The topic was: "How to resist mean words". We implemented the education within the Popálky camp, and we included it in the camp game. The children were attacked by mean words from the imaginary evil forest creatures – Stébelnice. This workshop aimed to show the possibilities of how to defend oneself against such "Stébelnice" – They are not the only ones who can attack with mean words. The educational meetings were attended by 22 children from all over Czechia aged 6–18 years.

The next two educational meetings were devoted to the topic of wound care and the possibilities of reconstructive and laser treatment of wounds. The event was organised in cooperation with the Department of Aesthetic and Plastic Surgery at the Olomouc University Hospital. The education was attended by 14 people (adult burned patients or parents of burned children).

MINISTERSTVO ZDRAVOTNICTVÍ
ČESKÉ REPUBLIKY

POPÁLKÝ CAMP

Every year Popálky organises a summer camp for injured children. It is also attended by their siblings and children of injured parents. Very often, they carry wounds in their lives as well, especially on their souls. They feel guilty for the accident or they feel pushed away because the injured sibling is given more care etc. Therefore, our goal is to offer them the stay as well. In 2019, the camp was held for the fourth time, this year in the village of Heřmanov in the Vysočina region. It was attended by 23 children from all over Czechia aged 6–18 years.

The theme of the camp this time was motivated by the book "Wandering for the Most Powerful Magic". In this book, a girl called Josefínka has to help the Queen of Waters to save the forest from drought and overcome many obstacles. She has to find out to whom she has not been kind enough. The answer to this camp-wide riddle is that it was herself. Everyone who wants to help to somebody else must love himself first. Then he or she can do everything. Thanks to this story, we helped the children with self-acceptance. The division of children into two age categories has proved successful. In proportion to their age, they tested their physical competence, creativity, cleverness, ability to help others and courage. During the week, we held two educational meetings, where we touched more deeply the topic of injury. Younger children worked under the guidance of an experienced lecturer and psychologist. By painting pictures, they described how their injuries occurred and what followed. With older group we discussed why this form of meeting is essential and what it brings them, or how to respond to the negative reactions from their environment. In this way, we have strengthened the children's ability to talk about these sensitive topics.

Everyone there has forgotten their worries caused by the accident. They spent a unique week in a safe environment of friends and lecturers with a similar fate. We showed them that even scarred bodies could dress in shorts, T-shirts and swimsuit and that despite everything what happened to them, life is beautiful and fun. We thank from the bottom of our hearts all those who helped us to organize the camp!

PREVENTION AND EDUCATION

SCHOOLS AND KINDERGARTENS

A moment of inattention or underestimation of risk is enough for a burn injury to happen.

Our preventive and educational activities aim to spread information about this type of injury and, at the same time to acquaint the public with the consequences of a burn injury. Properly provided first aid can alleviate the depth of the burn, the length of recovery, as well as the degree of lasting consequences. And most importantly – it can save lives.

Together with the Municipal Police and the Secondary Medical School and the Higher Vocational Medical School in Žďár nad Sázavou, we implemented a preventive program "It Burns" for local kindergartens. The whole event was initiated by the Municipal Police of Žďár nad Sázavou with the support of the Vysočina Region and the City of Žďár nad Sázavou. Thanks to the "It Burns" prevention program, we directly addressed 350 children and at least the same number of adults.

In total, in 2019, we implemented a prevention program in 10 kindergartens and 23 programs in 9 different primary schools throughout Czechia.

PREVENTION AND EDUCATION

PREVENTIVE TENT

/ 13 TRIPS, APPROX. 6,080 PEOPLE /

With our project "Preventive Tent", which has been operating since the spring of 2017, we visited many events across the country this year. Programs associated with integrated rescue systems or firefighters predominated, but we also participated primarily in entertainment events intended for the general public.

What is a Preventive Tent?

This is a mobile tent, which shows all five possible sources of burns and subsequent first aid. One side of it is a giant model of a kitchen unit. Visitors can try out the way a two-year-old child sees the kitchen in an interactive way. In the kitchen, 80 % of injuries occur mainly due to scalding of children under two years of age. The other side is dedicated to the danger of approaching the railway contact. We use the tent mainly at outdoor events from spring to autumn.

Project partners:

INTERNATIONAL WEEK FOR EQUALITY OF FACES

For the first time, we participated in the Be Treacher-Collins (Be TCS) face equality project. In May, the "More by Heart than by Eyes" campaign was held around the entire Czechia. As part of this campaign, Equality Faces Picnics were held in several cities on the same day. Representatives of Popálky took part in it in Brno.

Treacher-Collins syndrome is a congenital malformation that is caused by a mutation in the fifth chromosome, most visible in the face. People with this syndrome are very intelligent. However, due to their appearance, it is often not easy for them to integrate into society and everyday life, which is a common theme for people with burns as well. The project ambassador is Tamara Klusová, with whom our volunteer, Petr Ilčík, actively cooperated.

INTERNATIONAL DAY AGAINST BURNS

On the occasion of the International Day against Burns, on 8 October 2019, we went to the Šantovka Gallery in Olomouc with our project Preventive Tent. Together with us, there was also a stand of the Department of Plastic and Aesthetic Surgery, Olomouc University Hospital. Throughout the day, visitors could get information about first aid and follow-up treatment options. Many people who have personal experience with a burn injury visited us in the tent. An on the spot Czech Radio reportage featured a mother of a child that had suffered burns. She learned about the existence of Popálky in a hospital and became our client. The director of our organisation, Jana Lacinová, talked about prevention and risks associated with thermal injuries.

DAY OF KINDNESS IN BORY

During the Day of Kindness, which was held on 13 November 2019 and was initiated by the Karel Janeček Foundation, the pupils of the fifth grade of a primary school in Bory also decided to do a 'good deed'. After an agreement with their teacher, Věra Musilová, we asked them for a collection of gloves – mittens, which we would use in our prevention programs. The children from Bory made and distributed a leaflet with information about a mittens collection and having collected them handed us a full bag of them. Shapeless mittens are a great help for us when organizing preventive events. Children in schools put them on and try to perform various tasks with them, such as unzipping their jackets, taking off their shoes, making their ponytails etc. By doing this they try to put themselves in shoes of a burn victim who has his hands tied with bandages.

Pupils of the fifth grade, who carried out the collection of used mittens as part of the school project "Be kind", were excited about the topic and a chance to be helpful. The event also attracted their parents, who, together with other people from the village, also contributed to the collection. The handing over of the gloves to Popálky was done directly in the classroom when we talked about our mission and our patient stories.

FINANCING

With our active approach, we obtain funds for the implementation of our activities. In addition to developing projects and using state subsidies and grants, we cooperate with the private sector and small donors, and we have also expanded our economic activity.

EXAMPLES OF OUR FUNDRAISING ACTIVITIES:

We have a long-term cooperation with the **Association of Volunteer Firefighters of Bohemia, Moravia and Silesia**. Firefighters help us sell our fundraising items and patches for burns. The total proceeds in 2019 were **86,241 CZK (3,394 EUR)**.

An incredible **48,793 CZK (1,920 EUR)** was raised as part of the "**Hippos pálí pro Popálky**" ("**Hippos Shoot for Popálky**") benefit event. On Saturday, 2 February 2019, Jana Lacinová, Popálky's director, received a check for this amount from the chairman of the Hippos club in Žďár nad Sázavou, Tomáš Imramovský, in front of the crowded Žďár sports hall.

Teplárny Brno, plc has organized the fourth year of benefit golf for us. The proceeds consist of the contribution of individual participants and the gift of this company itself. This year's amount was a record **83,100 CZK (3,270 EUR)**.

This money helps us to implement an individual counselling service and thanks to that burn victims are not alone when dealing with the consequences of the accident ... Thank you!

Firefighting competition in Ratíškovice

Benefice for Popálky Prague

Donation of proceeds from Mikuláš of Ratíškovice

Handing over a check from WAPA s. r. o.

Benefit screening

Benefit golf IMP net

Contribution from TJ Sokol Hodonín

Handing over a check from Hettich ČR k. s. to CZK,13 500

St. Nicholas gift from the company Požární bezpečnost s.r.o. yield for Popálky

Do you also want to take an active part in helping burn victims? Become our donor.

You can support our activities by sending any amount to our public collection account: **2900837737/2010**

Thank you!

SUMMARY OF 2019

It was a year full of fundamental changes and hard work for Popálky. We see the change of our home base location from Brno to Vysočina (Žďár nad Sázavou), as the most significant shift. It gives us the advantage of the knowledge of the operational environment (we provide services nationwide, but we are from this region). This is connected with a change in the organisation's economics, establishing cooperation with other volunteers, donors, schools etc.

We worked to stabilise the services and the organisation itself. Since 2019, we have been members of the Association of Public Benefit Organizations of Czechia, z.s., whose advice and consultations we regularly use in various areas. We have expanded our fundraising activities as well as our economic activity. For example, we are newly organising training for foster parents. We are implementing preventive programs for a fee, and we have new sales items... In 2018, financial result of Popálky was -352,323.85 CZK (-13,866 EUR). In 2019, we reached 37,186.12 CZK (1,463 EUR). We think that these numbers are clear evidence of moving our organisation forward.

And what are our plans for the future? First of all, to continue fulfilling our mission to help burn victims, and to be a stable patient supporting organisation operating on a sound economic basis. And on a more prozaic side, to buy a company car and expand the number of employees providing individual counselling.

Thanks to everyone who helped get Popálky where they are. Thanks to all of you who will stay with us and continue to help...

On behalf of the Popálky team
Jana Tlustá
